AEROVENT®
Respiratory Solution

COMPOSITION
Each ml contains: isoproterenol hydrochloride 0.25 mg, ipratropium bromide 0.25 mg, sodium chloride, sodium edetate, benzalkonium chloride.

INDICATIONS AND DRUG INTERACTIONS
Inhalation of the solution may be used in the treatment of acute bronchial asthma, chronic obstructive pulmonary disease (COPD), life-threatening asthma attacks, and the prevention of asthma attacks. It is also used for bronchial asthma in children over 12 years old.

SIDE EFFECTS
During treatment with the solution, common side effects are dry mouth, fast and/or abnormal heart rate, and occasional episodes of sneezing, coughing, and colds. In rare cases, vomiting, headache, palpitations, and dizziness may occur.

IMMEDIATE HYPERSensitivity REACTIONS
Immediate hypersensitivity reactions may occur after the first dose of the solution. In the case of such reactions, the patient should be treated by an allergist.

OVERDOSE
In the event of an overdose, the patient should be treated by a doctor.

STORAGE
The medicine should be protected from light and stored below 25°C. Do not freeze.

HOW WILL THIS MEDICINE AFFECT YOUR SLEEP?
This medicine does not affect your sleep.

HOW WILL THIS MEDICINE AFFECT YOUR DIET?
This medicine does not affect your diet.

HOW WILL THIS MEDICINE AFFECT YOUR DRIVING OR OPERATING MACHINES?
This medicine may affect your ability to drive or operate machinery.

Pregnancy and Breastfeeding
This medicine is not recommended for use during pregnancy or breastfeeding.

ADVERSE REACTIONS AND DRUG INTERACTIONS
This medicine may interact with other medications. Consult your doctor before taking this medicine with other medications.

If you are taking another drug concomitantly or if you have a sensitivity to ipratropium bromide, it is essential to consult your doctor before taking this medicine.

Do not use this medicine if you have a sensitivity to ipratropium bromide.

Other side effects:
- Fast and/or abnormal heart rate
- Worsening of bronchospasm
- Worsening of asthma

THERAPEUTIC ACTIVITY
Anticholinergic. This medicine suppresses the secretory function of the bronchial glands and reduces bronchial secretions.

THERAPEUTIC GROUP
This medicine is classified as an anticholinergic.

COMPOSITION
This medicine contains isoproterenol hydrochloride, ipratropium bromide, sodium chloride, sodium edetate, and benzalkonium chloride.

STORAGE
This medicine should be stored below 25°C. Do not freeze.

ADOPTIVE THERAPY
This medicine is not intended for acute bronchospasm and is not intended for use in the treatment of asthma.

LACTATION
This medicine is not recommended for use during breastfeeding.

THERAPEUTIC ACTIVITY
This medicine is used to treat bronchial asthma and chronic obstructive pulmonary disease (COPD).

COMPOSITION
This medicine contains isoproterenol hydrochloride, ipratropium bromide, and sodium chloride.

STORAGE
This medicine should be stored below 25°C. Do not freeze.

ADOPTIVE THERAPY
This medicine is not intended for the treatment of asthma in children under 12 years old.

LACTATION
This medicine is not recommended for use during breastfeeding.

THERAPEUTIC ACTIVITY
